

# Comprehensive Blood Screen Panel

**\$150**

|                 |                |                      |
|-----------------|----------------|----------------------|
| Lipid Screen    | Potassium      | Globulins            |
| Thyroid hormone | Total Protein  | Glucose              |
| Calcium         | Hematocrit     | Albumin              |
| LDL Cholesterol | Hemoglobin A1C | PHOSPHATE            |
| HDL Cholesterol | Vitamin D      | SODIUM               |
| Triglycerides   | Bilirubin      | URIC ACID            |
| Iron            | Chloride       | Complete Blood Count |
| Magnesium       | Creatinine     |                      |

TSH (Thyroid Stimulating Hormone)

Estimated GLOMERULAR FILTRATION RATE (eGFR)

Alkaline Phosphatase

Aspartate Aminotransferase AST (SGOT)

BUN (Blood Urea Nitrogen)

GAMMA-GLUTAMYLTRANSFERASE (GGT)

LACTATE DEHYDROGENASE (LDH or LD)

Alanine Aminotransferase ALT (SGPT)

## Optional Blood Screening for Males - \$30 additional

PROSTATIC SPECIFIC ANTIGEN (PSA) is a blood test that measures a protein that is only produced by the male prostate gland. Elevations of PSA may occur in men with prostate cancer or non-cancerous prostatic diseases. Although high PSA values do not always indicate prostate cancer, all elevated values should be reported to your health care provider for further evaluation. A normal PSA level does not entirely exclude the possibility of prostate cancer.

# What Your Blood Results Tell You

|  |   |
|--|---|
| <b>MUSCLE BONE FUNCTION</b><br>Magnesium, Calcium, Phosphate | <b>PROSTATE HEALTH</b><br>PSA   |
| <b>ELECTROLYTES</b><br>Sodium, Potassium, Chloride           | <b>RED BLOOD CELL FUNCTION</b><br>Iron  |
| <b>DIABETES</b><br>Glucose                                   | <b>GOUT</b><br>Uric Acid  |
| <b>THYROID FUNCTION</b><br>TSH                               | <b>LIVER &amp; KIDNEY FUNCTION</b><br>ALT, AST, GGT, Bilirubin, BUN<br>Creatinine, eGFR |

**IT IS NOT POSSIBLE TO DIAGNOSE OR TREAT ANY DISEASE OR HEALTH PROBLEM WITH THIS BLOOD SCREEN ALONE.** It can help you learn more about your body and detect potential problems in early stages when treatment or changes in personal health habits can be most effective.
